

URBAN COMPASS PLANNING ASSISTANT

Is your council struggling with these issues?

- **Receiving more planning enquiries, pre-lodgements, and applications than you can handle?**
- **Developers/constituents venting frustrations about the staff, and to the staff?**
- **High turnover of Planning Staff *(or simply can't get planning staff)*?**

Are your Planners getting 'bogged down' with small, simple planning requests when they really need to be concentrating on the larger applications that need more time?

The Urban Compass Planning Assistant can allow you to take back planning control without 'burning out' your planning staff.

The Urban Compass Planning Assistant's integration with your planning scheme and mapping is unparalleled in the planning software world.

The Urban Compass Planning Assistant's ability to interpret the Council's planning scheme, coupled with our auditing process, ensures peace of mind that "It's getting it right".

1. MAXIMISE SAVINGS

The Urban Compass can answer enquiries, provide pre-lodgement minutes and generate a draft list of conditions and draft assessment report against an Urban Compass Planning Assistant AI-driven customer application - all done in a matter of minutes – not days or weeks! Not only does this free up important resources, but reduces the need for more.

2. FREE UP IMPORTANT PLANNING RESOURCES

Planning staff can be utilised far more efficiently to investigate strategic planning needs, concentrate on those complex or politically - sensitive applications, giving clearer and better understood planning decisions.

3. EASE THE PRESSURE ON PLANNING STAFF

Planners are integral to this process. The Urban Compass AI Planning Assistant can be easily expanded to enable it to meet the peaks and troughs of land development applications without 'burning out' valuable team members.

4. FAST-TRACK ENQUIRIES, PRE-LODGEMENTS AND APPROVALS

We understand Planning. Urban Compass is not just an AI company, its partners are Town Planners. So, we understand town planning and the need to fast-track enquiries, pre-lodgements, and approvals in the most efficient way possible; potentially saving Council constituents hundreds of thousands of dollars.

TALK TO US TODAY !

At Urban Compass Software, we would welcome the opportunity to organise a free, no-obligation demonstration of what can be achieved. Our team will customise the Urban Compass Software AI Assistant to your Council's needs and individual planning schemes.
